## Approval of Annual Financial Statements

---

The Accounting Officer is required by the Municipal Finance Management Act (Act 56 of 2003), to maintain adequate accounting records and is responsible for the content and integrity of the annual financial statements and related financial information included in this report. It is the responsibility of the Accounting Officer to ensure that the annual financial statements fairly present the state of affairs of the municipality as at the end of the financial year and the results of its operations and cash flows for the period then ended. The external auditors are engaged to express an independent opinion on the annual financial statements and are given unrestricted access to all financial records and related data.

The annual financial statements have been prepared in accordance with Standards of Generally Recognised Accounting Practice (GRAP) including any interpretations, guidelines and directives issued by the Accounting Standards Board.

The annual financial statements are based upon appropriate accounting policies consistently applied and supported by reasonable and prudent judgments and estimates.

The Accounting Officer acknowledges that he is ultimately responsible for the system of internal financial control established by the municipality and places considerable importance on maintaining a strong control environment. To enable the accounting officer to meet these responsibilities, the Accounting Officer sets standards for internal control aimed at reducing the risk of error or deficit in a cost effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the municipality and all employees are required to maintain the highest ethical standards in ensuring the municipality's business is conducted in a manner that in all reasonable circumstances is above reproach. The focus of risk management in the municipality is on identifying, assessing, managing and monitoring all known forms of risk across the municipality. While operating risk cannot be fully eliminated, the municipality endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

The Accounting Officer is of the opinion, based on the information and explanations given by management, that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the annual financial statements. However, any system of internal financial control can provide only reasonable, and not absolute assurance against material misstatement or deficit.

The Accounting Officer has reviewed the municipality's cash flow forecast for the year to 30 June, 2020 and in the light of this review and the current financial position, he is satisfied that the municipality has or has access to adequate resources to continue in operational existence for the foreseeable future.

The annual financial statements set out on pages 5 to 69, which have been prepared on the going concern basis, were approved by the Accounting Officer on 30 August 2019

### Significant increase/decrease is explained below;

- a) Service Charges: The municipal billing on refuse removal is more than what was anticipated at the time of preparing the adjustment budget, even though the budget was increased.
- b) Rendering of Services: The municipality budget on staff parking is R 26 570, however the actual performance is R 7 319, this contributed to the under performance of this line item..
- c) Rental of facilities: The municipality had anticipated less revenue, however there has been increase in the number of people using community halls.
- d) Agency services: The municipality received more income from the licensing and testing centre than what was initially anticipated, because of the increase in the number learner's and driver's license applications.
- e) Other income: The Municipality has over performance on tender fees R 85 913 (budget R 56 000), rates clearance certificates R 41 552 (budget R 29 567) and under performance on business licenses R 6 996 (budget R 37 374), photocopying fees R 50 182 (budget R 73 283).
- f) Interest received - investments: The municipality has anticipated more interest on investments than what the municipality actually received, due to decrease in cash and cash equivalents.
- g) Property rates: Additional rebates were offered to old age pensioners (i.e. 50% discount), however the budget did not provide /cater for such rebates, because the discounts depend on the number of applications. The Municipality gave additional rebates to Nondela as per the existing agreement, the municipality did not take this into account at the time of preparing the adjustments budget.
- h) Property rates penalties: The Municipality reversed interest charged against Nondela account, that was incorrectly charged and at the time of preparing the adjustments budget this was not considered.
- i) Government grants and subsidies : The municipality during the budget preparation expected to fully spend the allocations, however the following allocations remain unspent at year end:  
Community Service Grant R 279 548, a rollover application has been made to use the funds in 2019/2020 financial year,  
Small town rehabilitation grant amounting to R 64 441, savings have been declared on this grant,  
Market stalls grant amounting to R 486 364 the project is underway,  
Fresh produce grant amounting to R 81 474 , savings have been declared..
- j) Public contributions and donations: The Municipality received donation from Health Systems Trust and Department of Arts and Culture that was not budgeted for.

k) Fines: The law enforcement unit issued more traffic fines than what was initially anticipated due to increase in the number of traffic offenders.

l) Subsidies: The Municipality received additional subsidy from LGSeta that was not budgeted for.

m) Employee related cost : The municipality budgeted for vacant posts as per the approved organogram, some posts have not been filled including Director Technical Services.

n&o) As part of cost containment measures the Municipality has savings on these line items.

## Accounting Policies

---

### 1. Presentation of Annual Financial Statements

The annual financial statements have been prepared in accordance with the Standards of Generally Recognised Accounting Practice (GRAP), issued by the Accounting Standards Board in accordance with Section 122(3) of the Municipal Finance Management Act (Act 56 of 2003).

These annual financial statements have been prepared on an accrual basis of accounting and are in accordance with historical cost convention as the basis of measurement, unless specified otherwise.

A summary of the significant accounting policies, which have been consistently applied in the preparation of these annual financial statements, are disclosed below.

#### 1.1 Presentation currency

These annual financial statements are presented in South African Rand, which is the functional currency of the municipality.

#### 1.2 Going concern assumption

These annual financial statements have been prepared based on the expectation that the municipality will continue to operate as a going concern for at least the next 12 months.

#### 1.3 Property, plant and equipment

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one period.

The cost of an item of property, plant and equipment is recognised as an asset when:

- it is probable that future economic benefits or service potential associated with the item will flow to the municipality; and
- the cost of the item can be measured reliably.

Property, plant and equipment is initially measured at cost.

The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Trade discounts and rebates are deducted in arriving at the cost.

Where an asset is acquired through a non-exchange transaction, its cost is its fair value as at the date of acquisition.

Where an item of property, plant and equipment is acquired in exchange for a non-monetary asset or monetary asset, or a combination of monetary and non-monetary assets, the assets acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, its deemed cost is the carrying amount of the asset(s) given up.

When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Costs include costs incurred initially to acquire or construct an item of property, plant and equipment and costs incurred subsequently to add to, replace part of, or service it. If a replacement cost is recognised in the carrying amount of an item of property, plant and equipment, the carrying amount of the replaced part is derecognised.

The initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located is also included in the cost of property, plant and equipment, where the entity is obligated to incur such expenditure, and where the obligation arises as a result of acquiring the asset or using it for purposes other than the production of inventories.

Recognition of costs in the carrying amount of an item of property, plant and equipment ceases when the item is in the location and condition necessary for it to be capable of operating in the manner intended by management.

Items such as spare parts, standby equipment and servicing equipment are recognised when they meet the definition of property, plant and equipment.

# Okhahlamba Local Municipality

(Registration number KZN 235)

Annual Financial Statements for the year ended 30 June, 2019

## Accounting Policies

---

### 1.3 Property, plant and equipment (continued)

Major inspection costs which are a condition of continuing use of an item of property, plant and equipment and which meet the recognition criteria above are included as a replacement in the cost of the item of property, plant and equipment. Any remaining inspection costs from the previous inspection are derecognised.

Property, plant and equipment is carried at cost less accumulated depreciation and any impairment losses.

Property, plant and equipment are depreciated on the straight line basis over their expected useful lives to their estimated residual value.

The useful lives of items of property, plant and equipment have been assessed as follows:

Item	Depreciation method	Average useful life (Years)
Buildings	Straight line	30
Plant and machinery	Straight line	3 - 15
Motor vehicles	Straight line	7-10
Office equipment	Straight line	3 - 10
IT equipment	Straight line	3 - 10
Infrastructure	Straight line	
• Roads - Gravel	Straight line	3 - 10
• Roads - Tar	Straight line	10 - 15
• Paving	Straight line	5 - 30
Community	Straight line	
• Solid waste disposal	Straight line	5 - 25
• Community Assets	Straight line	5 - 30
leased Assets	Straight line	3 - 5

The depreciable amount of an asset is allocated on a systematic basis over its useful life.

Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately.

The depreciation method used reflects the pattern in which the asset's future economic benefits or service potential are expected to be consumed by the municipality. The depreciation method applied to an asset is reviewed at least at each reporting date and, if there has been a significant change in the expected pattern of consumption of the future economic benefits or service potential embodied in the asset, the method is changed to reflect the changed pattern. Such a change is accounted for as a change in an accounting estimate.

The municipality assesses at each reporting date whether there is any indication that the municipality expectations about the residual value and the useful life of an asset have changed since the preceding reporting date. If any such indication exists, the municipality revises the expected useful life and/or residual value accordingly. The change is accounted for as a change in an accounting estimate.

The depreciation charge for each period is recognised in surplus or deficit unless it is included in the carrying amount of another asset.

Items of property, plant and equipment are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset.

The gain or loss arising from the derecognition of an item of property, plant and equipment is included in surplus or deficit when the item is derecognised. The gain or loss arising from the derecognition of an item of property, plant and equipment is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item.

Assets which the municipality holds for rentals to others and subsequently routinely sell as part of the ordinary course of activities, are transferred to inventories when the rentals end and the assets are available-for-sale. Proceeds from sales of these assets are recognised as revenue. All cash flows on these assets are included in cash flows from operating activities in the cash flow statement.

## Accounting Policies

---

### 1.3 Property, plant and equipment (continued)

The municipality separately discloses expenditure to repair and maintain property, plant and equipment in the notes to the financial statements (see note 3).

The municipality discloses relevant information relating to assets under construction or development, in the notes to the financial statements (see note 3).

### 1.4 Intangible assets

An asset is identifiable if it either:

- is separable, i.e. is capable of being separated or divided from an entity and sold, transferred, licensed, rented or exchanged, either individually or together with a related contract, identifiable assets or liability, regardless of whether the entity intends to do so; or
- arises from binding arrangements (including rights from contracts), regardless of whether those rights are transferable or separable from the municipality or from other rights and obligations.

A binding arrangement describes an arrangement that confers similar rights and obligations on the parties to it as if it were in the form of a contract.

An intangible asset is recognised when:

- it is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the municipality; and
- the cost or fair value of the asset can be measured reliably.

The municipality assesses the probability of expected future economic benefits or service potential using reasonable and supportable assumptions that represent management's best estimate of the set of economic conditions that will exist over the useful life of the asset.

Where an intangible asset is acquired through a non-exchange transaction, its initial cost at the date of acquisition is measured at its fair value as at that date.

Expenditure on research (or on the research phase of an internal project) is recognised as an expense when it is incurred.

An intangible asset arising from development (or from the development phase of an internal project) is recognised when:

- it is technically feasible to complete the asset so that it will be available for use or sale.
- there is an intention to complete and use or sell it.
- there is an ability to use or sell it.
- it will generate probable future economic benefits or service potential.
- there are available technical, financial and other resources to complete the development and to use or sell the asset.
- the expenditure attributable to the asset during its development can be measured reliably.

Intangible assets are carried at cost less any accumulated amortisation and any impairment losses.

An intangible asset is regarded as having an indefinite useful life when, based on all relevant factors, there is no foreseeable limit to the period over which the asset is expected to generate net cash inflows or service potential. Amortisation is not provided for these intangible assets, but they are tested for impairment annually and whenever there is an indication that the asset may be impaired. For all other intangible assets amortisation is provided on a straight line basis over their useful life.

The amortisation period and the amortisation method for intangible assets are reviewed at each reporting date.

Reassessing the useful life of an intangible asset with a finite useful life after it was classified as indefinite is an indicator that the asset may be impaired. As a result the asset is tested for impairment and the remaining carrying amount is amortised over its useful life.

Internally generated brands, mastheads, publishing titles, customer lists and items similar in substance are not recognised as intangible assets.

Internally generated goodwill is not recognised as an intangible asset.

Amortisation is provided to write down the intangible assets, on a straight line basis, to their residual values as follows:

Annual Financial Statements for the year ended 30 June, 2019

## Accounting Policies

---

### 1.4 Intangible assets (continued)

Item	Useful life
Computer software, other	3 - 5 years

Intangible assets are derecognised:

- on disposal; or
- when no future economic benefits or service potential are expected from its use or disposal.

### 1.5 Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or a residual interest of another entity.

The amortised cost of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured at initial recognition minus principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount, and minus any reduction (directly or through the use of an allowance account) for impairment or uncollectibility.

A concessionary loan is a loan granted to or received by an entity on terms that are not market related.

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation.

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates.

Derecognition is the removal of a previously recognised financial asset or financial liability from an entity's statement of financial position.

A derivative is a financial instrument or other contract with all three of the following characteristics:

- Its value changes in response to the change in a specified interest rate, financial instrument price, commodity price, foreign exchange rate, index of prices or rates, credit rating or credit index, or other variable, provided in the case of a non-financial variable that the variable is not specific to a party to the contract (sometimes called the 'underlying').
- It requires no initial net investment or an initial net investment that is smaller than would be required for other types of contracts that would be expected to have a similar response to changes in market factors.
- It is settled at a future date.

The effective interest method is a method of calculating the amortised cost of a financial asset or a financial liability (or group of financial assets or financial liabilities) and of allocating the interest income or interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period to the net carrying amount of the financial asset or financial liability. When calculating the effective interest rate, an entity shall estimate cash flows considering all contractual terms of the financial instrument (for example, prepayment, call and similar options) but shall not consider future credit losses. The calculation includes all fees and points paid or received between parties to the contract that are an integral part of the effective interest rate (see the Standard of GRAP on Revenue from Exchange Transactions), transaction costs, and all other premiums or discounts. There is a presumption that the cash flows and the expected life of a group of similar financial instruments can be estimated reliably. However, in those rare cases when it is not possible to reliably estimate the cash flows or the expected life of a financial instrument (or group of financial instruments), the entity shall use the contractual cash flows over the full contractual term of the financial instrument (or group of financial instruments).

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable willing parties in an arm's length transaction.

A financial asset is:

- cash;
- a residual interest of another entity; or
- a contractual right to:
  - receive cash or another financial asset from another entity; or
  - exchange financial assets or financial liabilities with another entity under conditions that are potentially favourable to the entity.

## Accounting Policies

---

### 1.5 Financial instruments (continued)

A financial guarantee contract is a contract that requires the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payment when due in accordance with the original or modified terms of a debt instrument.

A financial liability is any liability that is a contractual obligation to:

- deliver cash or another financial asset to another entity; or
- exchange financial assets or financial liabilities under conditions that are potentially unfavourable to the entity.

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

Liquidity risk is the risk encountered by an entity in the event of difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset.

Loan commitment is a firm commitment to provide credit under pre-specified terms and conditions.

Loans payable are financial liabilities, other than short-term payables on normal credit terms.

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: currency risk, interest rate risk and other price risk.

Other price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting all similar financial instruments traded in the market.

A financial asset is past due when a counterparty has failed to make a payment when contractually due.

A residual interest is any contract that manifests an interest in the assets of an entity after deducting all of its liabilities. A residual interest includes contributions from owners, which may be shown as:

- equity instruments or similar forms of unitised capital;
- a formal designation of a transfer of resources (or a class of such transfers) by the parties to the transaction as forming part of an entity's net assets, either before the contribution occurs or at the time of the contribution; or
- a formal agreement, in relation to the contribution, establishing or increasing an existing financial interest in the net assets of an entity.

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. An incremental cost is one that would not have been incurred if the entity had not acquired, issued or disposed of the financial instrument.

Financial instruments at amortised cost are non-derivative financial assets or non-derivative financial liabilities that have fixed or determinable payments, excluding those instruments that:

- the entity designates at fair value at initial recognition; or
- are held for trading.

Financial instruments at cost are investments in residual interests that do not have a quoted market price in an active market, and whose fair value cannot be reliably measured.

Financial instruments at fair value comprise financial assets or financial liabilities that are:

- derivatives;
- combined instruments that are designated at fair value;
- instruments held for trading. A financial instrument is held for trading if:
  - it is acquired or incurred principally for the purpose of selling or repurchasing it in the near-term; or
  - on initial recognition it is part of a portfolio of identified financial instruments that are managed together and for which there is evidence of a recent actual pattern of short term profit-taking;
  - non-derivative financial assets or financial liabilities with fixed or determinable payments that are designated at fair value at initial recognition; and
  - financial instruments that do not meet the definition of financial instruments at amortised cost or financial instruments at cost.

# Okhahlamba Local Municipality

(Registration number KZN 235)

Annual Financial Statements for the year ended 30 June, 2019

## Accounting Policies

---

### 1.5 Financial instruments (continued)

#### Initial recognition

The entity recognises a financial asset or a financial liability in its statement of financial position when the entity becomes a party to the contractual provisions of the instrument.

The entity recognises financial assets using trade date accounting.

#### Initial measurement of financial assets and financial liabilities

The entity measures a financial asset and financial liability initially at its fair value plus transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

The entity measures a financial asset and financial liability initially at its fair value.

The entity first assesses whether the substance of a concessionary loan is in fact a loan. On initial recognition, the entity analyses a concessionary loan into its component parts and accounts for each component separately. The entity accounts for that part of a concessionary loan that is:

- a social benefit in accordance with the Framework for the Preparation and Presentation of Financial Statements, where it is the issuer of the loan; or
- non-exchange revenue, in accordance with the Standard of GRAP on Revenue from Non-exchange Transactions, where it is the recipient of the loan.

#### Subsequent measurement of financial assets and financial liabilities

The entity measures all financial assets and financial liabilities after initial recognition using the following categories:

- Financial instruments at fair value.
- Financial instruments at amortised cost.
- Financial instruments at cost.

All financial assets measured at amortised cost, or cost, are subject to an impairment review.

#### Fair value measurement considerations

The best evidence of fair value is quoted prices in an active market. If the market for a financial instrument is not active, the entity establishes fair value by using a valuation technique. The objective of using a valuation technique is to establish what the transaction price would have been on the measurement date in an arm's length exchange motivated by normal operating considerations. Valuation techniques include using recent arm's length market transactions between knowledgeable, willing parties, if available, reference to the current fair value of another instrument that is substantially the same, discounted cash flow analysis and option pricing models. If there is a valuation technique commonly used by market participants to price the instrument and that technique has been demonstrated to provide reliable estimates of prices obtained in actual market transactions, the entity uses that technique. The chosen valuation technique makes maximum use of market inputs and relies as little as possible on entity-specific inputs. It incorporates all factors that market participants would consider in setting a price and is consistent with accepted economic methodologies for pricing financial instruments. Periodically, an municipality calibrates the valuation technique and tests it for validity using prices from any observable current market transactions in the same instrument or based on any available observable market data.

The fair value of a financial liability with a demand feature is not less than the amount payable on demand, discounted from the first date that the amount could be required to be paid.

# Okhahlamba Local Municipality

(Registration number KZN 235)

Annual Financial Statements for the year ended 30 June, 2019

## Accounting Policies

---

### 1.5 Financial instruments (continued)

#### Reclassification

The entity does not reclassify a financial instrument while it is issued or held unless it is:

- combined instrument that is required to be measured at fair value; or
- an investment in a residual interest that meets the requirements for reclassification.

Where the entity cannot reliably measure the fair value of an embedded derivative that has been separated from a host contract that is a financial instrument at a subsequent reporting date, it measures the combined instrument at fair value. This requires a reclassification of the instrument from amortised cost or cost to fair value.

If fair value can no longer be measured reliably for an investment in a residual interest measured at fair value, the entity reclassifies the investment from fair value to cost. The carrying amount at the date that fair value is no longer available becomes the cost.

If a reliable measure becomes available for an investment in a residual interest for which a measure was previously not available, and the instrument would have been required to be measured at fair value, the entity reclassifies the instrument from cost to fair value.

#### Gains and losses

A gain or loss arising from a change in the fair value of a financial asset or financial liability measured at fair value is recognised in surplus or deficit.

For financial assets and financial liabilities measured at amortised cost or cost, a gain or loss is recognised in surplus or deficit when the financial asset or financial liability is derecognised or impaired, or through the amortisation process.

#### Impairment and uncollectibility of financial assets

The entity assesses at the end of each reporting period whether there is any objective evidence that a financial asset or group of financial assets is impaired.

Financial assets measured at amortised cost:

If there is objective evidence that an impairment loss on financial assets measured at amortised cost has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate. The carrying amount of the asset is reduced directly OR through the use of an allowance account. The amount of the loss is recognised in surplus or deficit.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed directly OR by adjusting an allowance account. The reversal does not result in a carrying amount of the financial asset that exceeds what the amortised cost would have been had the impairment not been recognised at the date the impairment is reversed. The amount of the reversal is recognised in surplus or deficit.

Financial assets measured at cost:

If there is objective evidence that an impairment loss has been incurred on an investment in a residual interest that is not measured at fair value because its fair value cannot be measured reliably, the amount of the impairment loss is measured as the difference between the carrying amount of the financial asset and the present value of estimated future cash flows discounted at the current market rate of return for a similar financial asset. Such impairment losses are not reversed.

#### Derecognition

##### Financial assets

The entity derecognises financial assets using trade date accounting.

The entity derecognises a financial asset only when:

- the contractual rights to the cash flows from the financial asset expire, are settled or waived;

# Okhahlamba Local Municipality

(Registration number KZN 235)

Annual Financial Statements for the year ended 30 June, 2019

## Accounting Policies

---

### 1.5 Financial instruments (continued)

- the entity transfers to another party substantially all of the risks and rewards of ownership of the financial asset; or
- the entity, despite having retained some significant risks and rewards of ownership of the financial asset, has transferred control of the asset to another party and the other party has the practical ability to sell the asset in its entirety to an unrelated third party, and is able to exercise that ability unilaterally and without needing to impose additional restrictions on the transfer. In this case, the entity :
  - derecognise the asset; and
  - recognise separately any rights and obligations created or retained in the transfer.

The carrying amounts of the transferred asset are allocated between the rights or obligations retained and those transferred on the basis of their relative fair values at the transfer date. Newly created rights and obligations are measured at their fair values at that date. Any difference between the consideration received and the amounts recognised and derecognised is recognised in surplus or deficit in the period of the transfer.

If the entity transfers a financial asset in a transfer that qualifies for derecognition in its entirety and retains the right to service the financial asset for a fee, it recognises either a servicing asset or a servicing liability for that servicing contract. If the fee to be received is not expected to compensate the entity adequately for performing the servicing, a servicing liability for the servicing obligation is recognised at its fair value. If the fee to be received is expected to be more than adequate compensation for the servicing, a servicing asset is recognised for the servicing right at an amount determined on the basis of an allocation of the carrying amount of the larger financial asset.

If, as a result of a transfer, a financial asset is derecognised in its entirety but the transfer results in the entity obtaining a new financial asset or assuming a new financial liability, or a servicing liability, the entity recognise the new financial asset, financial liability or servicing liability at fair value.

On derecognition of a financial asset in its entirety, the difference between the carrying amount and the sum of the consideration received is recognised in surplus or deficit.

If the transferred asset is part of a larger financial asset and the part transferred qualifies for derecognition in its entirety, the previous carrying amount of the larger financial asset is allocated between the part that continues to be recognised and the part that is derecognised, based on the relative fair values of those parts, on the date of the transfer. For this purpose, a retained servicing asset is treated as a part that continues to be recognised. The difference between the carrying amount allocated to the part derecognised and the sum of the consideration received for the part derecognised is recognised in surplus or deficit.

If a transfer does not result in derecognition because the entity has retained substantially all the risks and rewards of ownership of the transferred asset, the entity continue to recognise the transferred asset in its entirety and recognise a financial liability for the consideration received. In subsequent periods, the entity recognises any revenue on the transferred asset and any expense incurred on the financial liability. Neither the asset, and the associated liability nor the revenue, and the associated expenses are offset.

### Financial liabilities

The entity removes a financial liability (or a part of a financial liability) from its statement of financial position when it is extinguished — i.e. when the obligation specified in the contract is discharged, cancelled, expires or waived.

An exchange between an existing borrower and lender of debt instruments with substantially different terms is accounted for as having extinguished the original financial liability and a new financial liability is recognised. Similarly, a substantial modification of the terms of an existing financial liability or a part of it is accounted for as having extinguished the original financial liability and having recognised a new financial liability.

The difference between the carrying amount of a financial liability (or part of a financial liability) extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognised in surplus or deficit. Any liabilities that are waived, forgiven or assumed by another entity by way of a non-exchange transaction are accounted for in accordance with the Standard of GRAP on Revenue from Non-exchange Transactions.

# Okhahlamba Local Municipality

(Registration number KZN 235)

Annual Financial Statements for the year ended 30 June, 2019

## Accounting Policies

---

### 1.5 Financial instruments (continued)

#### Presentation

Interest relating to a financial instrument or a component that is a financial liability is recognised as revenue or expense in surplus or deficit.

Dividends or similar distributions relating to a financial instrument or a component that is a financial liability is recognised as revenue or expense in surplus or deficit.

Losses and gains relating to a financial instrument or a component that is a financial liability is recognised as revenue or expense in surplus or deficit.

Distributions to holders of residual interests are recognised by the entity directly in net assets. Transaction costs incurred on residual interests are accounted for as a deduction from net assets. Income tax [where applicable] relating to distributions to holders of residual interests and to transaction costs incurred on residual interests are accounted for in accordance with the International Accounting Standard on Income Taxes.

A financial asset and a financial liability are only offset and the net amount presented in the statement of financial position when the entity currently has a legally enforceable right to set off the recognised amounts and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

In accounting for a transfer of a financial asset that does not qualify for derecognition, the entity does not offset the transferred asset and the associated liability.

### 1.6 Leases

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership.

When a lease includes both land and buildings elements, the entity assesses the classification of each element separately.

#### Finance leases - lessor

The municipality recognises finance lease receivables as assets on the statement of financial position. Such assets are presented as a receivable at an amount equal to the net investment in the lease.

Finance revenue is recognised based on a pattern reflecting a constant periodic rate of return on the municipality's net investment in the finance lease.

#### Finance leases - lessee

Finance leases are recognised as assets and liabilities in the statement of financial position at amounts equal to the fair value of the leased property or, if lower, the present value of the minimum lease payments. The corresponding liability to the lessor is included in the statement of financial position as a finance lease obligation.

The discount rate used in calculating the present value of the minimum lease payments is 10 to 12%

Minimum lease payments are apportioned between the finance charge and reduction of the outstanding liability. The finance charge is allocated to each period during the lease term so as to produce a constant periodic rate of on the remaining balance of the liability.

Any contingent rents are expensed in the period in which they are incurred.

#### Operating leases - lessee

Operating lease payments are recognised as an expense on a straight-line basis over the lease term. The difference between the amounts recognised as an expense and the contractual payments are recognised as an operating lease asset or liability.

### 1.7 Impairment of cash-generating assets

Cash-generating assets are assets used with the objective of generating a commercial return. Commercial return means that positive cash flows are expected to be significantly higher than the cost of the asset.

Impairment is a loss in the future economic benefits or service potential of an asset, over and above the systematic recognition of the loss of the asset's future economic benefits or service potential through depreciation (amortisation).

Carrying amount is the amount at which an asset is recognised in the statement of financial position after deducting any accumulated depreciation and accumulated impairment losses thereon.

A cash-generating unit is the smallest identifiable group of assets used with the objective of generating a commercial return that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets.

Costs of disposal are incremental costs directly attributable to the disposal of an asset, excluding finance costs and income tax expense.

Depreciation (Amortisation) is the systematic allocation of the depreciable amount of an asset over its useful life.

Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

Recoverable amount of an asset or a cash-generating unit is the higher its fair value less costs to sell and its value in use.

Useful life is either:

- the period of time over which an asset is expected to be used by the municipality; or
- the number of production or similar units expected to be obtained from the asset by the municipality.

Criteria developed by municipality to distinguish the criteria cash-generating assets from non-cash-generating assets, are as follows:

#### Identification

When the carrying amount of a cash-generating asset exceeds its recoverable amount, it is impaired.

The municipality assesses at each reporting date whether there is any indication that a cash-generating asset may be impaired. If any such indication exists, the municipality estimates the recoverable amount of the asset.

Irrespective of whether there is any indication of impairment, the municipality also tests a cash-generating intangible asset with an indefinite useful life or a cash-generating intangible asset not yet available for use for impairment annually by comparing its carrying amount with its recoverable amount. This impairment test is performed at the same time every year. If an intangible asset was initially recognised during the current reporting period, that intangible asset was tested for impairment before the end of the current reporting period.

#### Value in use

Value in use of a cash-generating asset is the present value of the estimated future cash flows expected to be derived from the continuing use of an asset and from its disposal at the end of its useful life.

When estimating the value in use of an asset, the municipality estimates the future cash inflows and outflows to be derived from continuing use of the asset and from its ultimate disposal and the municipality applies the appropriate discount rate to those future cash flows.

#### Discount rate

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money, represented by the current risk-free rate of interest and the risks specific to the asset for which the future cash flow estimates have not been adjusted.

Annual Financial Statements for the year ended 30 June, 2019

## Accounting Policies

---

### 1.7 Impairment of cash-generating assets (continued)

#### Recognition and measurement (individual asset)

If the recoverable amount of a cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. This reduction is an impairment loss.

An impairment loss is recognised immediately in surplus or deficit.

Any impairment loss of a revalued cash-generating asset is treated as a revaluation decrease.

When the amount estimated for an impairment loss is greater than the carrying amount of the cash-generating asset to which it relates, the municipality recognises a liability only to the extent that is a requirement in the Standard of GRAP.

After the recognition of an impairment loss, the depreciation (amortisation) charge for the cash-generating asset is adjusted in future periods to allocate the cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

#### Cash-generating units

If there is any indication that an asset may be impaired, the recoverable amount is estimated for the individual asset. If it is not possible to estimate the recoverable amount of the individual asset, the municipality determines the recoverable amount of the cash-generating unit to which the asset belongs (the asset's cash-generating unit).

If an active market exists for the output produced by an asset or group of assets, that asset or group of assets is identified as a cash-generating unit, even if some or all of the output is used internally. If the cash inflows generated by any asset or cash-generating unit are affected by internal transfer pricing, the municipality use management's best estimate of future price(s) that could be achieved in arm's length transactions in estimating:

- the future cash inflows used to determine the asset's or cash-generating unit's value in use; and
- the future cash outflows used to determine the value in use of any other assets or cash-generating units that are affected by the internal transfer pricing.

Cash-generating units are identified consistently from period to period for the same asset or types of assets, unless a change is justified.

The carrying amount of a cash-generating unit is determined on a basis consistent with the way the recoverable amount of the cash-generating unit is determined.

An impairment loss is recognised for a cash-generating unit if the recoverable amount of the unit is less than the carrying amount of the unit. The impairment is allocated to reduce the carrying amount of the cash-generating assets of the unit on a pro rata basis, based on the carrying amount of each asset in the unit. These reductions in carrying amounts are treated as impairment losses on individual assets.

In allocating an impairment loss, the entity does not reduce the carrying amount of an asset below the highest of:

- its fair value less costs to sell (if determinable);
- its value in use (if determinable); and
- zero.

The amount of the impairment loss that would otherwise have been allocated to the asset is allocated pro rata to the other cash-generating assets of the unit.

Where a non-cash-generating asset contributes to a cash-generating unit, a proportion of the carrying amount of that non-cash-generating asset is allocated to the carrying amount of the cash-generating unit prior to estimation of the recoverable amount of the cash-generating unit.

### 1.8 Impairment of non-cash-generating assets

Cash-generating assets are assets used with the objective of generating a commercial return. Commercial return means that positive cash flows are expected to be significantly higher than the cost of the asset.

Non-cash-generating assets are assets other than cash-generating assets.

# Okhahlamba Local Municipality

Annual Financial Statements for the year ended 30 June, 2019

## Accounting Policies

---

### 1.8 Impairment of non-cash-generating assets (continued)

Impairment is a loss in the future economic benefits or service potential of an asset, over and above the systematic recognition of the loss of the asset's future economic benefits or service potential through depreciation (amortisation).

Carrying amount is the amount at which an asset is recognised in the statement of financial position after deducting any accumulated depreciation and accumulated impairment losses thereon.

A cash-generating unit is the smallest identifiable group of assets managed with the objective of generating a commercial return that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets.

Costs of disposal are incremental costs directly attributable to the disposal of an asset, excluding finance costs and income tax expense.

Depreciation (Amortisation) is the systematic allocation of the depreciable amount of an asset over its useful life.

Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

Recoverable service amount is the higher of a non-cash-generating asset's fair value less costs to sell and its value in use.

Useful life is either:

- the period of time over which an asset is expected to be used by the municipality; or
- the number of production or similar units expected to be obtained from the asset by the municipality.

Judgements made by management in applying the criteria to designate assets as non-cash-generating assets or cash-generating assets, are as follows:

#### Identification

When the carrying amount of a non-cash-generating asset exceeds its recoverable service amount, it is impaired.

The municipality assesses at each reporting date whether there is any indication that a non-cash-generating asset may be impaired. If any such indication exists, the municipality estimates the recoverable service amount of the asset.

Irrespective of whether there is any indication of impairment, the entity also tests a non-cash-generating intangible asset with an indefinite useful life or a non-cash-generating intangible asset not yet available for use for impairment annually by comparing its carrying amount with its recoverable service amount. This impairment test is performed at the same time every year. If an intangible asset was initially recognised during the current reporting period, that intangible asset was tested for impairment before the end of the current reporting period.

#### Value in use

Value in use of non-cash-generating assets is the present value of the non-cash-generating assets remaining service potential.

The present value of the remaining service potential of a non-cash-generating assets is determined using the following approach:

# Okhahlamba Local Municipality

(Registration number KZN 235)

Annual Financial Statements for the year ended 30 June, 2019

## Accounting Policies

---

### 1.8 Impairment of non-cash-generating assets (continued)

#### Recognition and measurement

If the recoverable service amount of a non-cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable service amount. This reduction is an impairment loss.

An impairment loss is recognised immediately in surplus or deficit.

Any impairment loss of a revalued non-cash-generating asset is treated as a revaluation decrease.

When the amount estimated for an impairment loss is greater than the carrying amount of the non-cash-generating asset to which it relates, the municipality recognises a liability only to the extent that is a requirement in the Standards of GRAP.

After the recognition of an impairment loss, the depreciation (amortisation) charge for the non-cash-generating asset is adjusted in future periods to allocate the non-cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

### 1.9 Employee benefits

Employee benefits are all forms of consideration given by an entity in exchange for service rendered by employees.

A qualifying insurance policy is an insurance policy issued by an insurer that is not a related party (as defined in the Standard of GRAP on Related Party Disclosures) of the reporting entity, if the proceeds of the policy can be used only to pay or fund employee benefits under a defined benefit plan and are not available to the reporting entity's own creditors (even in liquidation) and cannot be paid to the reporting entity, unless either:

- the proceeds represent surplus assets that are not needed for the policy to meet all the related employee benefit obligations; or
- the proceeds are returned to the reporting entity to reimburse it for employee benefits already paid.

Termination benefits are employee benefits payable as a result of either:

- an entity's decision to terminate an employee's employment before the normal retirement date; or
- an employee's decision to accept voluntary redundancy in exchange for those benefits.

Other long-term employee benefits are employee benefits (other than post-employment benefits and termination benefits) that are not due to be settled within twelve months after the end of the period in which the employees render the related service.

Vested employee benefits are employee benefits that are not conditional on future employment.

Composite social security programmes are established by legislation and operate as multi-employer plans to provide post-employment benefits as well as to provide benefits that are not consideration in exchange for service rendered by employees.

A constructive obligation is an obligation that derives from an entity's actions where by an established pattern of past practice, published policies or a sufficiently specific current statement, the entity has indicated to other parties that it will accept certain responsibilities and as a result, the entity has created a valid expectation on the part of those other parties that it will discharge those responsibilities.

Annual Financial Statements for the year ended 30 June, 2019

## Accounting Policies

---

### 1.9 Employee benefits (continued)

#### Short-term employee benefits

Short-term employee benefits are employee benefits (other than termination benefits) that are due to be settled within twelve months after the end of the period in which the employees render the related service.

Short-term employee benefits include items such as:

- wages, salaries and social security contributions;
- short-term compensated absences (such as paid annual leave and paid sick leave) where the compensation for the absences is due to be settled within twelve months after the end of the reporting period in which the employees render the related employee service;
- bonus, incentive and performance related payments payable within twelve months after the end of the reporting period in which the employees render the related service; and
- non-monetary benefits (for example, medical care, and free or subsidised goods or services such as housing, cars and cellphones) for current employees.

When an employee has rendered service to the entity during a reporting period, the entity recognise the undiscounted amount of short-term employee benefits expected to be paid in exchange for that service:

- as a liability (accrued expense), after deducting any amount already paid. If the amount already paid exceeds the undiscounted amount of the benefits, the entity recognise that excess as an asset (prepaid expense) to the extent that the prepayment will lead to, for example, a reduction in future payments or a cash refund; and
- as an expense, unless another Standard requires or permits the inclusion of the benefits in the cost of an asset.

The expected cost of compensated absences is recognised as an expense as the employees render services that increase their entitlement or, in the case of non-accumulating absences, when the absence occurs. The entity measure the expected cost of accumulating compensated absences as the additional amount that the entity expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

The entity recognise the expected cost of bonus, incentive and performance related payments when the entity has a present legal or constructive obligation to make such payments as a result of past events and a reliable estimate of the obligation can be made. A present obligation exists when the entity has no realistic alternative but to make the payments.

#### Post-employment benefits

Post-employment benefits are employee benefits (other than termination benefits) which are payable after the completion of employment.

Post-employment benefit plans are formal or informal arrangements under which an entity provides post-employment benefits for one or more employees.

Multi-employer plans are defined contribution plans (other than state plans and composite social security programmes) or defined benefit plans (other than state plans) that pool the assets contributed by various entities that are not under common control and use those assets to provide benefits to employees of more than one entity, on the basis that contribution and benefit levels are determined without regard to the identity of the entity that employs the employees concerned.

#### Multi-employer plans

The entity classifies a multi-employer plan and/or state plans and/or composite social security programmes as a defined contribution plan or a defined benefit plan under the terms of the plan (including any constructive obligation that goes beyond the formal terms).

Where a plan is a defined contribution plan, the entity accounts for in the same way as for any other defined contribution plan.

When sufficient information is not available to use defined benefit accounting for a plan, that is a defined benefit plan, the entity account for the plan as if it was a defined contribution plan.

# Okhahlamba Local Municipality

(Registration number KZN 235)

Annual Financial Statements for the year ended 30 June, 2019

## Accounting Policies

---

### 1.9 Employee benefits (continued)

#### Post-employment benefits: Defined contribution plans

Defined contribution plans are post-employment benefit plans under which an entity pays fixed contributions into a separate entity (a fund) and will have no legal or constructive obligation to pay further contributions if the fund does not hold sufficient assets to pay all employee benefits relating to employee service in the current and prior periods.

When an employee has rendered service to the entity during a reporting period, the entity recognise the contribution payable to a defined contribution plan in exchange for that service:

- as a liability (accrued expense), after deducting any contribution already paid. If the contribution already paid exceeds the contribution due for service before the reporting date, an entity recognise that excess as an asset (prepaid expense) to the extent that the prepayment will lead to, for example, a reduction in future payments or a cash refund; and
- as an expense, unless another Standard requires or permits the inclusion of the contribution in the cost of an asset.

Where contributions to a defined contribution plan do not fall due wholly within twelve months after the end of the reporting period in which the employees render the related service, they are discounted. The rate used to discount reflects the time value of money. The currency and term of the financial instrument selected to reflect the time value of money is consistent with the currency and estimated term of the obligation.

#### Actuarial assumptions

Actuarial assumptions are unbiased and mutually compatible.

Financial assumptions are based on market expectations, at the reporting date, for the period over which the obligations are to be settled.

The rate used to discount post-employment benefit obligations (both funded and unfunded) reflect the time value of money. The currency and term of the financial instrument selected to reflect the time value of money is consistent with the currency and estimated term of the post-employment benefit obligations.

Post-employment benefit obligations are measured on a basis that reflects:

- estimated future salary increases;
- the benefits set out in the terms of the plan (or resulting from any constructive obligation that goes beyond those terms) at the reporting date; and
- estimated future changes in the level of any state benefits that affect the benefits payable under a defined benefit plan, if, and only if, either:
  - those changes were enacted before the reporting date; or
  - past history, or other reliable evidence, indicates that those state benefits will change in some predictable manner, for example, in line with future changes in general price levels or general salary levels.

Assumptions about medical costs take account of estimated future changes in the cost of medical services, resulting from both inflation and specific changes in medical costs.

#### Long service awards

The municipality offers long service award/bonus to an employee that has completed the following periods:

5 years service = 5 days  
10 years service = 10 days  
15 years service = 20 days  
20-45 years service = 30 days

The employees may elect to either take or encash the days, the encashment or taking of the leave must take place in the same year that employee qualifies for the recognition/long service leave.

Based on previous experience, employees elect encashment of the days over taking leave days.

An employee that has 5 or more years service with the municipality and leaves the the service of the municipality for any reason whatsoever, excluding reasons relating to misconduct, shall receive a pro rata long service bonus for any uncompleted period stipulated above.

---

### 1.10 Provisions and contingencies

Provisions are recognised when:

- the municipality has a present obligation as a result of a past event;
- it is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation; and
- a reliable estimate can be made of the obligation.

The amount of a provision is the best estimate of the expenditure expected to be required to settle the present obligation at the reporting date.

Where the effect of time value of money is material, the amount of a provision is the present value of the expenditures expected to be required to settle the obligation.

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

Where some or all of the expenditure required to settle a provision is expected to be reimbursed by another party, the reimbursement is recognised when, and only when, it is virtually certain that reimbursement will be received if the municipality settles the obligation. The reimbursement is treated as a separate asset. The amount recognised for the reimbursement does not exceed the amount of the provision.

Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. Provisions are reversed if it is no longer probable that an outflow of resources embodying economic benefits or service potential will be required, to settle the obligation.

Where discounting is used, the carrying amount of a provision increases in each period to reflect the passage of time. This increase is recognised as an interest expense.

A provision is used only for expenditures for which the provision was originally recognised.

Provisions are not recognised for future operating surplus (deficit).

If an entity has a contract that is onerous, the present obligation (net of recoveries) under the contract is recognised and measured as a provision.

A constructive obligation to restructure arises only when an entity:

- has a detailed formal plan for the restructuring, identifying at least:
  - the activity/operating unit or part of a activity/operating unit concerned;
  - the principal locations affected;
  - the location, function, and approximate number of employees who will be compensated for services being terminated;
  - the expenditures that will be undertaken; and
  - when the plan will be implemented; and
- has raised a valid expectation in those affected that it will carry out the restructuring by starting to implement that plan or announcing its main features to those affected by it.

A restructuring provision includes only the direct expenditures arising from the restructuring, which are those that are both:

- necessarily entailed by the restructuring; and
- not associated with the ongoing activities of the municipality

No obligation arises as a consequence of the sale or transfer of an operation until the municipality is committed to the sale or transfer, that is, there is a binding arrangement.

After their initial recognition contingent liabilities recognised in entity combinations that are recognised separately are subsequently measured at the higher of:

- the amount that would be recognised as a provision; and
- the amount initially recognised less cumulative amortisation.

Contingent assets and contingent liabilities are not recognised. Contingencies are disclosed in note 32.

# Okhahlamba Local Municipality

(Registration number KZN 235)

Annual Financial Statements for the year ended 30 June, 2019

## Accounting Policies

---

### 1.10 Provisions and contingencies (continued)

A financial guarantee contract is a contract that requires the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payment when due in accordance with the original or modified terms of a debt instrument.

Loan commitment is a firm commitment to provide credit under pre-specified terms and conditions.

The municipality recognises a provision for financial guarantees and loan commitments when it is probable that an outflow of resources embodying economic benefits and service potential will be required to settle the obligation and a reliable estimate of the obligation can be made.

Determining whether an outflow of resources is probable in relation to financial guarantees requires judgement. Indications that an outflow of resources may be probable are:

- financial difficulty of the debtor;
- defaults or delinquencies in interest and capital repayments by the debtor;
- breaches of the terms of the debt instrument that result in it being payable earlier than the agreed term and the ability of the debtor to settle its obligation on the amended terms; and
- a decline in prevailing economic circumstances (e.g. high interest rates, inflation and unemployment) that impact on the ability of entities to repay their obligations.

Where a fee is received by the municipality for issuing a financial guarantee and/or where a fee is charged on loan commitments, it is considered in determining the best estimate of the amount required to settle the obligation at reporting date. Where a fee is charged and the municipality considers that an outflow of economic resources is probable, a municipality recognises the obligation at the higher of:

- the amount determined using in the Standard of GRAP on Provisions, Contingent Liabilities and Contingent Assets; and
- the amount of the fee initially recognised less, where appropriate, cumulative amortisation recognised in accordance with the Standard of GRAP on Revenue from Exchange Transactions.

### Landfill Rehabilitation Provision

The Landfill Rehabilitation Provision is created for the rehabilitation of the current operational sites at the future estimated time of closure.

The value of the provision is based on the expected future cost to rehabilitate of the various site discounted back to the statement of position at the cost of capital, which is currently 3.23% (2018: 3.63%).

The municipality has an obligation to rehabilitate these landfill sites. The cost of such property includes the initial estimate of the cost of rehabilitating the land and restoring the site on which it is located, the obligation which the municipality incurs as a consequence of having used the property during a particular year for landfill purposes. The municipality estimates the useful lives and makes assumption to the useful lives of these assets, which influences the provision for future costs.

The asset is measured using the cost model :

- a) subject to (b), changes in the liability are added to, deducted from, the cost of the related assets in the current period;
- b) if a decrease in the liability exceeds the carrying amount of the asset, the excess is recognised immediately in surplus or deficit; and
- c) if the adjustment results in an addition to the cost of an asset, the economic entity considers whether this is an indication that the new carrying amount of the asset may not be fully recoverable. if it is such an indication, the asset is tested for impairment by estimating its recoverable amount, and any impairment loss is recognised in surplus or deficit.

### 1.11 Commitments

Items are classified as commitments when an entity has committed itself to future transactions that will normally result in the outflow of cash.

Disclosures are required in respect of unrecognised contractual commitments.

Commitments for which disclosure is necessary to achieve a fair presentation should be disclosed in a note to the financial statements, if both the following criteria are met:

- Contracts should be non-cancelable or only cancelable at significant cost (for example, contracts for computer or building maintenance services); and

# Okhahlamba Local Municipality

(Registration number KZN 235)

Annual Financial Statements for the year ended 30 June, 2019

## Accounting Policies

---

### 1.11 Commitments (continued)

- Contracts should relate to something other than the routine, steady, state business of the entity – therefore salary commitments relating to employment contracts or social security benefit commitments are excluded. Commitments are disclosed inclusive of VAT.

### 1.12 Revenue from exchange transactions

Revenue is the gross inflow of economic benefits or service potential during the reporting period when those inflows result in an increase in net assets, other than increases relating to contributions from owners.

An exchange transaction is one in which the municipality receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of goods, services or use of assets) to the other party in exchange.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

#### Measurement

Revenue is measured at the fair value of the consideration received or receivable, net of trade discounts and volume rebates.

#### Rendering of services

When the outcome of a transaction involving the rendering of services can be estimated reliably, revenue associated with the transaction is recognised by reference to the stage of completion of the transaction at the reporting date. The outcome of a transaction can be estimated reliably when all the following conditions are satisfied:

- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality;
- the stage of completion of the transaction at the reporting date can be measured reliably; and
- the costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

When services are performed by an indeterminate number of acts over a specified time frame, revenue is recognised on a straight line basis over the specified timeframe unless there is evidence that some other method better represents the stage of completion. When a specific act is much more significant than any other acts, the recognition of revenue is postponed until the significant act is executed.

When the outcome of the transaction involving the rendering of services cannot be estimated reliably, revenue is recognised only to the extent of the expenses recognised that are recoverable.

Service revenue is recognised by reference to the stage of completion of the transaction at the reporting date. Stage of completion is determined by surveys of work performed.

#### Interest

Revenue arising from the use by others of entity assets yielding interest, or similar distributions is recognised when:

- It is probable that the economic benefits or service potential associated with the transaction will flow to the municipality, and
- The amount of the revenue can be measured reliably.

Interest is recognised, in surplus or deficit, using the effective interest rate method.

Service fees included in the price of the product are recognised as revenue over the period during which the service is performed.

### 1.13 Revenue from non-exchange transactions

Revenue comprises gross inflows of economic benefits or service potential received and receivable by an municipality, which represents an increase in net assets, other than increases relating to contributions from owners.

Conditions on transferred assets are stipulations that specify that the future economic benefits or service potential embodied in the asset is required to be consumed by the recipient as specified or future economic benefits or service potential must be returned to the transferor.

# Okhahlamba Local Municipality

(Registration number KZN 235)

Annual Financial Statements for the year ended 30 June, 2019

## Accounting Policies

---

### 1.13 Revenue from non-exchange transactions (continued)

Control of an asset arises when the municipality can use or otherwise benefit from the asset in pursuit of its objectives and can exclude or otherwise regulate the access of others to that benefit.

Exchange transactions are transactions in which one entity receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of cash, goods, services, or use of assets) to another entity in exchange.

Expenses paid through the tax system are amounts that are available to beneficiaries regardless of whether or not they pay taxes.

Fines are economic benefits or service potential received or receivable by entities, as determined by a court or other law enforcement body, as a consequence of the breach of laws or regulations.

Non-exchange transactions are transactions that are not exchange transactions. In a non-exchange transaction, a municipality either receives value from another municipality without directly giving approximately equal value in exchange, or gives value to another municipality without directly receiving approximately equal value in exchange.

Restrictions on transferred assets are stipulations that limit or direct the purposes for which a transferred asset may be used, but do not specify that future economic benefits or service potential is required to be returned to the transferor if not deployed as specified.

Stipulations on transferred assets are terms in laws or regulation, or a binding arrangement, imposed upon the use of a transferred asset by entities external to the reporting municipality.

### Recognition

An inflow of resources from a non-exchange transaction recognised as an asset is recognised as revenue, except to the extent that a liability is also recognised in respect of the same inflow.

As the municipality satisfies a present obligation recognised as a liability in respect of an inflow of resources from a non-exchange transaction recognised as an asset, it reduces the carrying amount of the liability recognised and recognises an amount of revenue equal to that reduction.

### Measurement

Revenue from a non-exchange transaction is measured at the amount of the increase in net assets recognised by the municipality.

When, as a result of a non-exchange transaction, the municipality recognises an asset, it also recognises revenue equivalent to the amount of the asset measured at its fair value as at the date of acquisition, unless it is also required to recognise a liability. Where a liability is required to be recognised it will be measured as the best estimate of the amount required to settle the obligation at the reporting date, and the amount of the increase in net assets, if any, recognised as revenue. When a liability is subsequently reduced, because the taxable event occurs or a condition is satisfied, the amount of the reduction in the liability is recognised as revenue.

### IGRAP 1

Fines are recognised as revenue when the receivable meets the definition of an asset and satisfies the criteria for recognition as an asset.

Assets arising from fines are measured at the best estimate of the inflow of resources to the municipality.

Where the municipality collects fines in the capacity of an agent, the fine will not be revenue of the collecting entity.

### Gifts and donations, including goods in-kind

Gifts and donations, including goods in-kind, are recognised as assets and revenue when it is probable that the future economic benefits or service potential will flow to the municipality and the fair value of the assets can be measured reliably.

# Okhahlamba Local Municipality

(Registration number KZN 235)

Annual Financial Statements for the year ended 30 June, 2019

## Accounting Policies

---

### 1.14 Investment income

Investment income is recognised on a time-proportion basis using the effective interest method.

### 1.15 Accounting by principals and agents

#### Identification

An agent is an entity that has been directed by another entity (a principal), through a binding arrangement, to undertake transactions with third parties on behalf of the principal and for the benefit of the principal.

A principal is an entity that directs another entity (an agent), through a binding arrangement, to undertake transactions with third parties on its behalf and for its own benefit.

A principal-agent arrangement results from a binding arrangement in which one entity (an agent), undertakes transactions with third parties on behalf, and for the benefit of, another entity (the principal).

#### Identifying whether an entity is a principal or an agent

When the municipality is party to a principal-agent arrangement, it assesses whether it is the principal or the agent in accounting for revenue, expenses, assets and/or liabilities that result from transactions with third parties undertaken in terms of the arrangement.

The assessment of whether an municipality is a principal or an agent requires the municipality to assess whether the transactions it undertakes with third parties are for the benefit of another entity or for its own benefit.

#### Recognition

The municipality, as a principal, recognises revenue and expenses that arise from transactions with third parties in a principal-agent arrangement in accordance with the requirements of the relevant Standards of GRAP.

The municipality, as an agent, recognises only that portion of the revenue and expenses it receives or incurs in executing the transactions on behalf of the principal in accordance with the requirements of the relevant Standards of GRAP.

The municipality recognises assets and liabilities arising from principal-agent arrangements in accordance with the requirements of the relevant Standards of GRAP.

### 1.16 Comparative figures

Where necessary, comparative figures have been reclassified to conform to changes in presentation in the current year.

### 1.17 Unauthorised expenditure

Unauthorised expenditure means:

- overspending of a vote or a main division within a vote; and
- expenditure not in accordance with the purpose of a vote or, in the case of a main division, not in accordance with the purpose of the main division.

All expenditure relating to unauthorised expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

### 1.18 Fruitless and wasteful expenditure

Fruitless expenditure means expenditure which was made in vain and would have been avoided had reasonable care been exercised.

All expenditure relating to fruitless and wasteful expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

# Okhahlamba Local Municipality

(Registration number KZN 235)

Annual Financial Statements for the year ended 30 June, 2019

## Accounting Policies

---

### 1.19 Irregular expenditure

Irregular expenditure is expenditure that is contrary to the Municipal Finance Management Act (Act No.56 of 2003), the Municipal Systems Act (Act No.32 of 2000), and the Public Office Bearers Act (Act No. 20 of 1998) or is in contravention of the economic entity's supply chain management policy. Irregular expenditure excludes unauthorised expenditure. Irregular expenditure is accounted for as expenditure in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

### 1.20 Budget information

Municipality are typically subject to budgetary limits in the form of appropriations or budget authorisations (or equivalent), which is given effect through authorising legislation, appropriation or similar.

General purpose financial reporting by municipality shall provide information on whether resources were obtained and used in accordance with the legally adopted budget.

The approved budget is prepared on a accrual basis and presented by economic classification linked to performance outcome objectives.

The approved budget covers the fiscal period from 2018-07-01 to 2019-06-30.

The budget for the economic entity includes all the entities approved budgets under its control.

The annual financial statements and the budget are on the same basis of accounting therefore a comparison with the budgeted amounts for the reporting period have been included in the Statement of comparison of budget and actual amounts.

The Statement of comparative and actual information has been included in the annual financial statements as the recommended disclosure when the annual financial statements and the budget are on the same basis of accounting as determined by National Treasury.

Comparative information is not required.

### 1.21 Related parties

The municipality operates in an economic sector currently dominated by entities directly or indirectly owned by the South African Government. As a consequence of the constitutional independence of the three spheres of government in South Africa, only entities within the national sphere of government are considered to be related parties.

Management are those persons responsible for planning, directing and controlling the activities of the municipality, including those charged with the governance of the municipality in accordance with legislation, in instances where they are required to perform such functions.

Close members of the family of a person are considered to be those family members who may be expected to influence, or be influenced by, that management in their dealings with the municipality.

Only transactions with related parties not at arm's length or not in the ordinary course of business are disclosed.

### 1.22 Events after reporting date

Events after reporting date are those events, both favourable and unfavourable, that occur between the reporting date and the date when the financial statements are authorised for issue. Two types of events can be identified:

- those that provide evidence of conditions that existed at the reporting date (adjusting events after the reporting date); and
- those that are indicative of conditions that arose after the reporting date (non-adjusting events after the reporting date).

The municipality will adjust the amount recognised in the financial statements to reflect adjusting events after the reporting date once the event occurred.

The municipality will disclose the nature of the event and an estimate of its financial effect or a statement that such estimate cannot be made in respect of all material non-adjusting events, where non-disclosure could influence the economic decisions of users taken on the basis of the financial statements.

Annual Financial Statements for the year ended 30 June, 2019

## Accounting Policies

---

### 1.23 Significant judgements and sources of estimation uncertainty

In preparing the annual financial statements, management is required to make estimates and assumptions that affect the amounts represented in the annual financial statements and related disclosures. Use of available information and the application of judgement is inherent in the formation of estimates. Actual results in the future could differ from these estimates which may be material to the annual financial statements. Significant judgements include:

#### Impairment testing

The municipality reviews and tests the carrying value of assets when events or changes in circumstances suggest that the carrying amount may not be recoverable.

#### Provisions

Provisions were raised and management determined an estimate based on the information available. Additional disclosure of these estimates of provisions are included in note 14 - Provisions.

#### Allowance for doubtful debts

The Municipality's management in exercising reasonable judgement in determining the provision for doubtful debt has considered GRAP 104, the assessment of the debtors and taking into account the risk factors presented by the debtors (type of debtor, amounts owing, payments history, economic indicators). Changes to the assumptions used are accounted for as a change in accounting estimates in terms of GRAP 3.

### 1.24 Statutory receivables

#### Identification

Statutory receivables are receivables that arise from legislation, supporting regulations, or similar means, and require settlement by another entity in cash or another financial asset.

Carrying amount is the amount at which an asset is recognised in the statement of financial position.

The cost method is the method used to account for statutory receivables that requires such receivables to be measured at their transaction amount, plus any accrued interest or other charges (where applicable) and, less any accumulated impairment losses and any amounts derecognised.

Nominal interest rate is the interest rate and/or basis specified in legislation, supporting regulations or similar means.

The transaction amount (for purposes of this Standard) for a statutory receivable means the amount specified in, or calculated, levied or charged in accordance with, legislation, supporting regulations, or similar means.

#### Recognition

The municipality recognises statutory receivables as follows:

- if the transaction is an exchange transaction, using the policy on Revenue from exchange transactions;
- if the transaction is a non-exchange transaction, using the policy on Revenue from non-exchange transactions (Taxes and transfers); or
- if the transaction is not within the scope of the policies listed in the above or another Standard of GRAP, the receivable is recognised when the definition of an asset is met and, when it is probable that the future economic benefits or service potential associated with the asset will flow to the entity and the transaction amount can be measured reliably.

#### Initial measurement

The municipality initially measures statutory receivables at their transaction amount.

#### Subsequent measurement

The municipality measures statutory receivables after initial recognition using the cost method. Under the cost method, the initial measurement of the receivable is changed subsequent to initial recognition to reflect any:

- interest or other charges that may have accrued on the receivable (where applicable);

# Okhahlamba Local Municipality

Annual Financial Statements for the year ended 30 June, 2019

## Accounting Policies

---

### 1.24 Statutory receivables (continued)

- impairment losses; and
- amounts derecognised.

#### Derecognition

The municipality derecognises a statutory receivable, or a part thereof, when:

- the rights to the cash flows from the receivable are settled, expire or are waived;
- the municipality transfers to another party substantially all of the risks and rewards of ownership of the receivable; or
- the municipality, despite having retained some significant risks and rewards of ownership of the receivable, has transferred control of the receivable to another party and the other party has the practical ability to sell the receivable in its entirety to an unrelated third party, and is able to exercise that ability unilaterally and without needing to impose additional restrictions on the transfer. In this case, the entity:
  - derecognise the receivable; and
  - recognise separately any rights and obligations created or retained in the transfer.

The carrying amounts of any statutory receivables transferred are allocated between the rights or obligations retained and those transferred on the basis of their relative fair values at the transfer date. The entity considers whether any newly created rights and obligations are within the scope of the Standard of GRAP on Financial Instruments or another Standard of GRAP. Any difference between the consideration received and the amounts derecognised and, those amounts recognised, are recognised in surplus or deficit in the period of the transfer.

### 1.25 Borrowing costs

Borrowing costs are interest and other expenses incurred by an entity in connection with the borrowing of funds.

Borrowing costs are recognised as an expense in the period in which they are incurred.

### 1.26 Service concession arrangements: Municipality as grantor

#### Identification

Service concession arrangement is a contractual arrangement between a grantor and an operator in which an operator uses the services concession asset to provide a mandated function on behalf of a grantor for a specified period, where the operator is compensated for its services over the period of service concession arrangement.

A grantor is the municipality that grants the right to use the service concession asset to the operator.

A mandated function involves the delivery of a public service by an operator on behalf of a grantor that falls within the grantor's mandate.

An operator is the entity that uses the service concession asset to provide a mandated function subject to the grantor's control of the asset.

A service concession asset is an asset used to provide a mandated function in a service concession arrangement that:

- is provided by the operator which:
  - the operator constructs, develops, or acquires from a third party; or
  - is an existing asset of the operator; or
- is provided by the grantor which:
  - is an existing asset of the grantor; or
  - is an upgrade to an existing asset of the grantor.

#### Recognition of asset and liability

The municipality recognises an asset provided by the operator and an upgrade to an existing asset of the entity, as a service concession asset if the municipality controls or regulates what services the operator must provide with the asset, to whom it must provide them, and at what price, and if the municipality controls (through ownership, beneficial entitlement or otherwise) any significant residual interest in the asset at the end of the term of the arrangement. This applies to an asset used in a service concession arrangement for its entire economic life (a "whole-of-life" asset).

After initial recognition or reclassification, service concession assets are clearly identified from other assets within the same asset category, and are clearly identified from owned and/or leased assets.

# Okhahlamba Local Municipality

(Registration number KZN 235)

Annual Financial Statements for the year ended 30 June, 2019

## Accounting Policies

---

### 1.26 Service concession arrangements: Municipality as grantor (continued)

Where the municipality recognises a service concession asset, and the asset is not an existing asset of the municipality (grantor), the municipality (grantor) also recognises a liability.

The municipality does not recognise a liability when an existing asset of the entity is reclassified as a service concession asset, except in circumstances where additional consideration is provided by the operator.

#### Measurement of asset and liability

The municipality initially measures the service concession asset as follows:

- Where the asset is not an existing asset of the entity, the asset is measured at its fair value.
- Where the asset is an existing asset of the entity and it meets the recognition criteria of a service concession asset, the asset is reclassified as a service concession asset, and the asset is accounted for in accordance with the policy on Investment property, Property, plant and equipment, Intangible assets, or Heritage assets, as appropriate.

The municipality initially measures the liability at the same amount as the service concession asset, adjusted by the amount of any other consideration from the municipality to the operator, or from the operator to the municipality.

#### Dividing the arrangement

If the municipality pays for the construction, development, acquisition, or upgrade of a service concession asset partly by incurring a financial liability and partly by the grant of a right to the operator, it accounts separately for each part of the total liability.

#### Other liabilities, contingent liabilities and contingent assets

The municipality accounts for other liabilities, contingent liabilities, and contingent assets arising from a service concession arrangement in accordance with the policy on Provisions, Contingent liabilities and contingent assets and Financial instruments.

#### Other revenues

The municipality accounts for revenues from a service concession arrangement, other than those relating to the grant of a right to the operator model, in accordance with the Standard of GRAP on Revenue from exchange transactions.

### 1.27 Off setting

Assets and liabilities, revenue and expenses should not be offset; these items should be reported separately. Offsetting is permitted only if it is required or permitted by other standards of GRAP (GRAP 25), Legislation or where offsetting reflects the substance of the transaction or the event.

### 2. New standards and interpretations

#### 2.1 Standards and interpretations issued, but not yet effective

The municipality has not applied the following standards and interpretations, which have been published and are mandatory for the municipality's accounting periods beginning on or after 1 July, 2019 or later periods:

##### **GRAP 32 Service Concession Arrangement : Grantor**

The Municipality has used this standard in developing an accounting policy as per directive 5. The transitional provision for this standard in terms of directive 4 is as follows:

When the municipality initially adopts a standard of GRAP, GRAP 3 requires a municipality to apply the requirements of the standard being adopted retrospectively.

##### **GRAP 108 Statutory Receivables**

The Municipality has used this standard in developing an accounting policy as per directive 5. The transitional provision for this standard in terms of directive 4 is as follows:

When the municipality initially adopts a standard of GRAP, GRAP 3 requires a municipality to apply the requirements of the standard being adopted retrospectively, except for those changes specified in paragraphs .136 and 137.

##### **GRAP 109 Accounting by principalsand Agents**

The Municipality has used this standard in developing an accounting policy as per directive 5. The transitional provision for this standard in terms of directive 4 is as follows:

When the municipality initially adopts a standard of GRAP, GRAP 3 requires a municipality to apply the requirements of the standard being adopted retrospectively.

Standard/ Interpretation:	Effective date: Years beginning on or after	Expected impact:
• GRAP 32: Service Concession Arrangements: Grantor	1 April, 2019	Impact is currently being assessed
• GRAP 108: Statutory Receivables	1 April, 2019	Impact is currently being assessed
• GRAP 109: Accounting by Principals and Agents	1 April, 2019	Impact is currently being assessed

### 5. Employee benefit obligations

#### Defined benefit plan

##### Post retirement medical aid plan

The municipality operates an accredited medical aid scheme. The post retirement medical aid plan, to which 2018: 1 member belongs, consists of the Key Health Medical Scheme. Pensioners continue on the option they belong to on the day of their retirement.

The single member of the medical aid plan passed on in October 2018, the Municipality has derecognised the continuation pensioners liability.

The principal actuarial assumptions used were as follows:

Discount rate per annum	- %	8.28 %
Health care cost inflation rate	- %	7.08 %
Benchmark inflation (equal to salary inflation)	- %	5.58 %

#### The amounts recognised in the statement of financial position were

Post retirement medical obligation	-	212,899
------------------------------------	---	---------

#### Reconciliation of the movement in the liability

Opening balance	212,899	202,703
Interest cost	-	15,751
Expected employee benefit payments	(10,838)	(31,172)
Actuarial (gain)/loss	-	25,617
Derecognition of the liability	(202,061)	-
	-	212,899

#### Net expense recognised in the statement of financial performance

Interest cost	-	15,751
Expected employee benefit payments	-	(31,172)
Actuarial (gain)/loss	-	25,617
	-	10,196

#### Post retirement pension plan

The Municipality's personnel are members of one of the Natal Joint Municipal Pension (NJMPF) retirement funds, namely the Superannuation, Retirement and Provident Funds. As the aforementioned funds are multi- employer funds, the allocation of any surplus/ deficit to individual municipalities cannot be determined.

Furthermore, disclosure of further details such as actuarial assumptions cannot be attributed to any specific municipality and is of no relevance to the users of the municipality's financial statements. As the required disclosure information cannot be obtained the funds are all treated as defined contribution plans.

An independent valuer carries out statutory valuation of the NJMPF on a triennial basis and an interim valuation on an annual basis. The 2019 interim valuations have not been released.

#### Superannuation funds

The latest statutory valuation of the Superannuation Fund (defined benefit) as at 31 March 2017 concluded that:

The Fund's liabilities for service to the valuation date was 100% (2017: 100 %) funded on the discounted cash flow method

At the valuation date:

Annual Financial Statements for the year ended 30 June, 2019

## Notes to the Annual Financial Statements

Figures in Rand	2019	2018
-----------------	------	------

### 5. Employee benefit obligations (continued)

The fund is 100% funded on the "best estimate" funding basis as at the valuation date, and is also not fully funded on the "financial soundness" basis incorporating the full solvency reserve.

There was no deficit in respect of active members. A surcharge of 9.5% of pensionable salaries is payable.

#### Retirement fund

The latest statutory valuation of the Retirement Fund (defined benefit) as at 31 March 2017 reflected:

The memorandum account in respect of pensioners was 95.3% funded

Based on the valuation assumptions applied in 2016, the Fund was fully funded, however based on revised assumptions the Funds liabilities for the contributory members exceeded the value of the assets and an extension of the surcharge for another 5 years would be necessary to return the funding level to 100%.

The statutory actuarial valuation carried out on the retirement fund as at 31 March 2017 reflected:

The Fund is 100% (2016: 93.8%) funded as at the valuation date at the overall level. A number of members is steadily reducing, due to members electing to transfer to one of other Natal Joint Funds or external fund. A recommendation is the current surcharge of 21.65% of pensionable salaries continues to be paid in order to build up the Solvency Reserve to the full theoretical level.

#### Provident fund

The latest statutory valuation of the Provident Fund was performed as at 31 March 2017.

#### Long service awards

The independent valuers, carried out a statutory valuation on the long service leave benefit as at 30 June 2019.

The principal actuarial assumptions used were as follows:

Figures in Rand	2019	2018
-----------------	------	------

### 9. Consumer debtors (continued)

#### Consumer debtors impairment analysis

Consumer debtors which are less than 3 months past due are not considered to be impaired. At 30 June, 2019, R3 087 131 (2018: R 3 644 824) were past due but not impaired.

The ageing of amounts past due but not impaired and those impaired is as follows:

Amount not past due or impaired	2,673,856	3,382,397
Amount past due but not impaired	3,087,131	3,644,824
Amount past due and impaired	47,732,615	36,531,213
	<b>53,493,602</b>	<b>43,558,434</b>

#### Consumer debtors impaired

As of 30 June, 2019, consumer debtors of R47 732 615 (2018: R 36,531,213) were impaired and provided for.

The amount of the provision was R 32 392 650 as at 30 June, 2019 (2018: R 24,427,693).

## Notes to the Annual Financial Statements

Figures in Rand	2019	2018
<b>12. Finance lease obligation</b>		
<b>Minimum lease payments due</b>		
- within one year	5,399,603	7,095,566
- in second to fifth year inclusive	16,279,997	20,737,026
	21,679,600	27,832,592
less: future finance charges	(3,514,142)	(5,250,674)
<b>Present value of minimum lease payments</b>	<b>18,165,458</b>	<b>22,581,918</b>
<b>Present value of minimum lease payments due</b>		
- within one year	4,470,591	5,914,899
- in second to fifth year inclusive	13,694,867	16,667,019
	<b>18,165,458</b>	<b>22,581,918</b>
Non-current liabilities	13,694,867	16,666,973
Current liabilities	4,470,591	5,914,899
	<b>18,165,458</b>	<b>22,581,872</b>

The municipality's obligations under finance leases are secured by the lessor's charge over the leased assets. The assets leased include vehicles and laptops.

### ABSA Lease Agreements

The municipality has entered into a finance lease agreement with ABSA during 2017/2018 financial year to finance plant and machinery.

The average lease term is 3-5 years and the fixed borrowing rate for vehicles is 10.25%.

Interest rates are fixed at the contract date. All leases have fixed repayments and no arrangements have been entered into for contingent rent.

Included in motor vehicles is an amount of R 18 634 641 and included in IT equipment is an amount of R 183 328. See note 3.

### 13. Unspent conditional grants and receipts

**Unspent conditional grants and receipts comprises of:**

#### Unspent conditional grants and receipts

Human Settlements Housing Grant	798,717	290,487
Fresh Produce Market Grant	81,474	245,500
Housing Projects Grant	9,900,153	9,900,153
Local Government Sectorial Education and Training Authority Grant	8,215	54,615
Small Town Rehabilitation Grant	64,441	-
Community Service Centre Grant	279,548	-
	<b>11,132,548</b>	<b>10,490,755</b>

The nature and extent of government grants recognised in the annual financial statements is an indication of other forms of government assistance received by the municipality. Unfulfilled conditions remains a liability at year end and are disclosed in the statement of financial position.

See note 18 for reconciliation of grants from National/Provincial Government.

## Notes to the Annual Financial Statements

Figures in Rand	2019	2018
-----------------	------	------

### 14. Provisions

#### Reconciliation of provisions - 2019

	Opening Balance	Additions	Interest Cost	Payments	Increase in the future value	Total
Environmental rehabilitation	4,447,552	-	161,446	-	2,432,835	7,041,833
Performance Bonuses	648,619	577,873	-	(684,368)	-	542,124
	<b>5,096,171</b>	<b>577,873</b>	<b>161,446</b>	<b>(684,368)</b>	<b>2,432,835</b>	<b>7,583,957</b>

#### Reconciliation of provisions - 2018

	Opening Balance	Additions	Interest costs	Increase in future value	Total
Environmental rehabilitation	4,158,844	-	129,340	159,368	4,447,552
Performance bonuses	637,120	11,499	-	-	648,619
	<b>4,795,964</b>	<b>11,499</b>	<b>129,340</b>	<b>159,368</b>	<b>5,096,171</b>

Non-current liabilities	6,363,000	4,286,106
Current liabilities	1,220,957	810,065
	<b>7,583,957</b>	<b>5,096,171</b>

The provision for rehabilitation of landfill site relates to the legal obligation to rehabilitate the landfill site used for waste disposal. It is calculated as the present value of the future obligation discounted at 3.23% over a nil remaining useful life.

Balance of the provision for landfill site rehabilitation R 7 041 833 (2018: R 4 447 552)

Increase in the cost of property, plant and equipment R2 432 835 (2018: R159 368).

The provisions includes the Section 57 employees performance bonuses, the position for Director Technical Services was vacant, this led to the decrease in provision.

### 15. Payables from exchange transactions

	<b>7,977,887,401</b>	<b>7,768,464,401</b>

Valuations on properties are performed every 5 years. The last general valuation came into effect on 1 July 2017. Interim valuations are processed on an annual basis to take into account changes in individual property values due to alterations and subdivisions. Interim valuations have been received for the 2018/19 financial year.

Assessments rates are determined by applying the following cents in the Rand on the market valuation:

Agriculture properties used for agriculture purposes	0.00218	0.00207
Business and commercial properties	0.00874	0.00831
Industrial properties	0.00874	0.00831
Municipal properties, land reform, informal settlements, public worship	0.00874	0.00831
Public service infrastructure and Public benefit organisations	0.00218	0.00207
Residential Properties and State	0.00874	0.00831
Communal Land, Privately Developed, Tourism and Hospitality	0.00874	0.00831
Municipal properties binded by lease agreement	0.00874	0.00831

### Rebates granted to:

Agricultural and Agricultural small holdings	20 %	20 %
Place of Worship, Communal Land and Municipal Property	100 %	100 %
Privately Developed Estates	20 %	20 %
Public Service Infrastructure	100 %	100 %
Residential small holding and rural residential	20 %	20 %

Annual Financial Statements for the year ended 30 June, 2019

## Notes to the Annual Financial Statements

Figures in Rand	2019	2018
-----------------	------	------

### 24. Remuneration of councillors (continued)

#### In-kind benefits

The Mayor, Deputy Mayor, and Speaker are full-time. Each is provided with an office and secretarial support at the cost of the Council.

The Mayor has four full-time bodyguards/drivers and the use of a Council owned vehicle.

The Deputy Mayor has three full-time bodyguards/drivers and the use of a Council owned vehicle.

The Speaker has three full-time bodyguards/drivers and the use of a Council owned vehicle.

#### Accounting Officer's certification of Councillors remuneration

The Accounting Officer certifies that the salaries, allowances and benefits of Councillors as disclosed above are within the upper limits of the framework envisaged in Section 219 of the Constitution read with the Remuneration of Public Office Bearer's Act.

#### Subsistence and travelling reimbursement

The councillors' subsistence and travelling reimbursement R 43 489 is included under general expenses in the statement of Financial Performance.

### 25. Debt impairment

Debt impairment - Consumer debtors	8,210,371	6,843,856
Debt impairment-Traffic fines	351,738	183,938
	<b>8,562,109</b>	<b>7,027,794</b>

Debt impairment for consumer debtors is R 8 210 371. Increase in provision from R 24 182 280 ( 2018:R 24 427 693 - R 245 413) to 2019: R32 392 650. An amount of R 245 413 was written off against the debt impairment.

Debt impairment for traffic fines is R 351 738, the provision increased from 2018: R 746 478 to 2019: 1 098 216.

### 26. Interest received

#### Interest revenue

Interest received - Current Account	1,218,608	1,684,033
Interest received - Investments	1,929,061	2,175,207
	<b>3,147,669</b>	<b>3,859,240</b>

### 27. Depreciation and amortisation

Property, plant and equipment	19,118,217	18,578,276
Intangible assets	265,061	436,949
	<b>19,383,278</b>	<b>19,015,225</b>

Refer to reconciliation in note 3 and 4 for further details. Depreciation and amortisation is calculated over the useful life of the asset and reflects the realisation of that asset through continued use.

<b>Approved but not yet contracted for</b>		
• Operational projects not yet contracted for	438,521	14,797,168

## 32. Contingent liabilities

Microvulintuthuko Business Enterprise CC is attempting to claim payments against the municipality in relation to retention funds deducted in the course of the project (Bergville licensing and testing centre) as well as payment for alleged outstanding invoices, since the contract was terminated by the municipality. The municipality disputes this claim. The claim amount is: R 3 120 080 (claim for work done)  
R 690 176 (retention)

At this stage it is not probable that the municipality will pay, because the odds of success appear to be even.

The arbitration is currently pending before the bargaining council. An ex employee has claimed that his/her dismissal for abscondment/desertion was both substantively and procedurally unfair. At this stage the monetary value of the claim cannot be determined because the determination of the amount is entirely dependent on the Commissioner.

### Contingent assets

No contingent assets exist for the period ended 30 June 2019 (2018: Nil)

## 33. Change in Estimate

In 2018/2019 the municipality provided 100% debt impairment on unregistered land, this resulted in change in estimate because in 2017/2018 the municipality only provided 100% on unregistered land that was due more than 90 days.

The effect of this revision has increased the debt impairment provision on unregistered land by R 546 377 in 2018/2019.

The effect on the increase of debt impairment provision is as follows:

	Debt impairment provision before	Debt impairment provision after	Difference (Change in debt impairment provision)
Unregistered land	8,377,739	8,924,116	546,377

# Okhahlamba Local Municipality

(Registration number KZN 235)

Annual Financial Statements for the year ended 30 June, 2019

## Notes to the Annual Financial Statements

Figures in Rand	2019	2018
-----------------	------	------

### 34. Prior period errors

There was an agreement entered into between the Municipality and Mastertrade 288 (Pty) Ltd in 2005, that was later amended in 2007, where it was concluded that the Municipality will not charge property rates and essential services on the developments, until the date such specific erf is registered into the name of the third party (i.e. the purchaser).

The Municipality reversed the interest charges to the Nondela account (5003263) and account for additional rebates that should have been offered over the years.

### Adjustments in 2016/2017 and prior years

Reversal of Interest charged up to 30 June 2017 R 6 632 817, accounting for additional rebates as per the agreement R 2 274 385 and reversal of debt impairment on the account R 7 343 120. The accumulated surplus decreased by R 1 564 082 and consumer debtors decreased by R 1 564 082.

### Adjustments in 2017/2018

Property rates billing on account number 5003263 was R 142 300, rebates offered were R 28 460 and R 113 840 was the net rates reported. The amount of R 113 840 should have been additional rebates as per the agreement, the property rates figure previously reported has been reduced by this amount.

Interest charges to account number 5003263 amounting to R 1 193 627 have been reversed, the property rates - penalties imposed figure previously reported has been reduced by this amount.

Debt impairment figure previously reported has been reduced by R 1 549 913 which was the debt impairment movement in 2017/2018 for account number 5003263.

### Overall effects in the Statement of Financial Position as at 30 June 2018

Consumer debtors  $(-R\ 2\ 274\ 385 - R\ 6\ 632\ 817 + R\ 7\ 343\ 120 - R\ 113\ 840 - R\ 1\ 193\ 627 + R\ 1\ 549\ 913) = -R\ 1\ 321\ 636$ .

Accumulated surplus  $(-R\ 2\ 274\ 385 - R\ 6\ 632\ 817 + R\ 7\ 343\ 120 - R\ 113\ 840 - R\ 1\ 193\ 627 + R\ 1\ 549\ 913) = -R\ 1\ 321\ 636$ .

### Reclassification of 5% discount on property rates

In 2017/2018 the municipality reported 5% discounts offered on property rates amounting to R 117 665 as an expense included in general expenses (Indigent support) instead of property rates rebates.

### Property Plant and Equipment

During the process of reconciling the Valuation Roll and the Fixed Assets Register the municipality identified land that belongs to the municipality, however this land was not in the Fixed Assets Register. The land is initially recognised at fair value.

### Adjustments in 2016/2017 and prior years

Land with the total fair value of R 3 310 000 was in the Valuation Roll that was implemented on the 1st of July 2013 however not in the Fixed Asset Register. Land was increased by this amount and the accumulated surplus was increased by this amount.

### Adjustments in 2017/2018

Land with the total fair value of R 2 149 000 was in the Valuation Roll that was implemented in on the 1st of July 2017, but this land was not in the Fixed Assets Register. Land was increased by this amount and fair value gain was increased by this amount.

The correction of the error(s) results to the following adjustments:

Debt impairment		(8,577,707)	-	1,549,913	(7,027,794)

### 35. Risk management

#### Financial risk management

Due to the largely non-trading nature of the activities and the way in which they are financed, municipalities are not exposed to the degree of financial risk faced by business entities.

The municipality's finance function monitors and manages the financial risks relating to the operations of the municipality. These risks include credit risk, liquidity risk, market risk relating to interest rate risk.

#### Liquidity risk

The municipality's risk to liquidity is a result of the funds available to cover future commitments. The municipality manages liquidity risk through an ongoing review of future commitments and credit facilities.

The table below analyses the municipality's financial liabilities and net-settled derivative financial liabilities into relevant maturity groupings based on the remaining period at the statement of financial position to the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows. Balances due within 12 months equal their carrying balances as the impact of discounting is not significant.

Other: Lease obligation	4,470,591	5,914,899
Trade and Other Payables	33,203,508	24,722,669
<b>Maximum liquidity exposure</b>	<b>37,674,099</b>	<b>30,637,568</b>

#### Credit risk

Credit risk consists mainly of cash deposits, cash equivalents, derivative financial instruments and trade debtors. The municipality only deposits cash with major banks with high quality credit standing and limits exposure to any one counter-party.

Except as detailed below, the carrying amount of financial assets recorded in the Annual Financial Statements, which is net of impairment losses, represents the municipality's maximum exposure to credit risk without taking account of the value of any collateral obtained.

Financial assets exposed to credit risk at year end were as follows:

Financial instrument	2019	2018
Cash and cash equivalents	26,657,949	29,591,731
Trade and other receivables	21,535,662	19,487,180

#### Market risk

## Notes to the Annual Financial Statements

Figures in Rand	2019	2018
-----------------	------	------

### 35. Risk management (continued)

#### Interest rate risk

As the municipality has no significant interest-bearing assets, the municipality's income and operating cash flows are substantially independent of changes in market interest rates.

Cash and Cash Equivalents	26,657,949	29,591,731
---------------------------	------------	------------

#### Price risk

Due to legislative restrictions, the municipality does not trade these investments.

### 36. Events after the reporting date

There are no material events that occurred after the reporting date 30 June 2019.

### 37. Fruitless and wasteful expenditure

#### Reconciliation of fruitless and wasteful expenditure

Opening balance	787,409	776,395
Interest and penalties	51,260	35,366
Amount written off by Council	-	(24,352)
<b>Closing balance</b>	<b>838,669</b>	<b>787,409</b>

An amount of R 776 395 is as a result of misconduct by a former employee during 2014/2015 financial year, a case was opened against the employee for payments made to ghost employees and the case is currently under investigation by the South African Police Services. The matter is currently in criminal court.

An amount of R 62 274 for interest and penalties incurred on late payments has been referred to MPAC for investigation in terms of section 32 of the MFMA.

### 38. Irregular expenditure

#### Reconciliation of Irregular expenditure

Opening balance	13,821,849	14,124,849
Written off by Council	(13,821,849)	(303,000)
Expenditure incurred during the year	93,130	-
<b>Closing balance</b>	<b>93,130</b>	<b>13,821,849</b>

#### Opening balance

This relates to forensic investigations related to prior years 2007/2008, 2008/2009 and 2009/2010. The reports that have been concluded have been reported to South African Police Services and included in irregular expenditure. The amount has been written off as irrecoverable by council after the recommendation of the MPAC since the docket has been closed by the South African Police Service.

#### Incident 2018/2019

An amount of R 93 130 has been incurred on medical expenses and examinations, the service provider was identified as a supplier who is the service of the state by the Auditor General during the 2017/2018 audit, the Council referred the matter to the MPAC for investigation as per section 32 of the MFMA.

### 39. Unauthorised expenditure

Expenditure incurred during the year	2,442,196	-
--------------------------------------	-----------	---

In 2018/2019 the provision for rehabilitating the landfill site increased and the municipality did not budget for this. The increase in the provision was due to factors outside the municipality's control. This has been reported to Council, the Council referred the matter to the MPAC for investigations in terms of section 32 of the MFMA.

### 40. Additional disclosure in terms of Municipal Finance Management Act

#### Audit fees
